

## Océ CrystalPoint technology

Océ CrystalPoint™ technology has been developed entirely by Océ to deliver high quality color and black & white prints on plain and recycled paper. Using patented Océ TonerPearls™ it is ideal for a wide range of applications including CAD plots, GIS documents and business graphics.

## Benefits

- Highly accurate fine details
- High readability of fine details and smooth area fills
- No toner feathering for sharp lines
- Unique "silk shine" boosts plain paper prints
- Adds value to plain paper prints for a wide range of applications: CAD plots, GIS documents, business graphics and more
- Same look & feel for both color and black & white prints
- Waterfast prints
- Toner crystallization ensures strong adhesion to any media
- Prints can be used outdoors and for mark-ups

## Increased productivity

- Direct-dry prints
- Immediate handling, stacking and folding

## Environmentally friendly

- No ozone emissions
- No odor
- Minimal waste disposal
- Toner waste is completely non-toxic and solid and can be disposed of as part of regular office waste
- No system contamination by "powder" or ink
